VINCENT PERETI

FRONTEND WEB DEVELOPER

Professional Summary

Enthusiastic and detail-oriented Junior Web Developer with a solid foundation in front-end technologies and a passion for creating user-friendly, responsive web experiences. Proficient in HTML, CSS, and JavaScript, with hands-on experience using popular frameworks and libraries such as React and Bootstrap. Experience in code versioning tools like Git, SVN, and Bitbucket, Adept at translating design mockups into high-quality, maintainable code while ensuring cross-browser compatibility and performance optimization. Eager to contribute to collaborative projects, learn new technologies, and grow within a dynamic development team. Strong problem-solving skills and a commitment to continuous improvement in web development best practices.

WORK EXPERIENCE

Web Designer | Intermax Networks | January 2018 to Current

Responsibilities:

- Collaborate with cross-functional teams using Git and GitHub to manage and streamline development workflows.
- Develop and maintain web applications using HTML, CSS, JavaScript, and other languages and frameworks like React and Vue.
- Use debugging tools and techniques to troubleshoot and resolve issues.
- Develop and maintain brand identity by creating consistent visual elements such as logos, color schemes, typography, and imagery.
- Work with clients or stakeholders to understand their design project needs, objectives, and preferences.
- Present design concepts and mockups to clients or team members for feedback and approval.
- Make revisions based on client or stakeholder feedback and refine designs to meet project requirements.
- Document code and development processes to ensure maintainability and ease of understanding for other developers.
- Manage multiple projects simultaneously, ensuring timely delivery and adherence to deadlines.
- Continuously improve your knowledge and skills in web development through learning new technologies, attending training sessions, and staying updated with industry trends.
- Ensure that websites and applications are responsive and provide a good user experience across different devices and screen sizes.
- Participate in design reviews and provide constructive feedback to peers.
- Analyze competitors' designs and industry trends to inform and inspire your own design work.
- Document design processes, standards, and project details to facilitate knowledge sharing and consistency.
- Explore new design techniques, tools, and approaches to enhance creativity and efficiency.
- Assist in project tasks and follow project timelines and requirements set by project managers or leads.
- Implement basic security practices, such as sanitizing inputs and handling data securely, to protect web applications from common vulnerabilities.
